

## JavaScript ▾

```
var person = {
  firstName: 'Mandi',
  lastName: 'Wise',
  getName: function() {
    return this.firstName + ' ' + this.lastName;
  }
};

//console.log( person.getName() );

var letters = ['A', 'B', 'C']

var people = [
  {
    name: 'Mandi', pets: ['2 dogs']
  },
  {
    name: 'Rose', pets: ['1 dogs', 'a Ben']
  }
];

$.each(people, function(index, person) {
  //console.log(person.name);
  //console.log(this.name);
});

// console.log(person[0].name); for selecting only one.

people.forEach(function(person, index) {
  console.log(person.pets[0], index);
});
```
